

Thomas Christen received his MD and PhD from the University of Geneva Medical School, Switzerland, and is a Swiss Board-Certified Cardiologist with advanced training in echocardiography. During his PhD he studied smooth muscle cell differentiation, inflammation, and mechanisms of restenosis. From 2006 to 2009, he was a Post-doctoral Research Fellow in the Cardiology Division of the Brigham and Women's Hospital. His research included molecular imaging of inflammation in atherosclerosis and heart transplantation. Thomas Christen joined Boston Scientific in August of 2009 and is currently Senior Medical Director in the Cardiology division. His team is responsible for providing medical oversight of BSC sponsored Interventional Cardiology trials and patient safety.
